EDUCATION

Manipal Institute of Technology, Bengaluru

2023 - 2027

B.Tech in Computer Science & Engineering (Data Science)

Relevant Coursework: Machine Learning, Big Data Analytics, Database Management Systems, Natural Language Processing

PRODUCT & STRATEGY EXPERIENCE

PricewaterhouseCoopers (PwC)

Jun 2026 - Aug 2026

Intern, Advisory - Intelligent Business Systems | India

- Led product discovery for an agentic-AI opportunity assessment for a Fortune 500 e-commerce client: mapped end-to-end workflows, benchmarked competitor AI-agent adoption, and identified 10+ automation opportunities, prioritizing 3 for Q3 2026 execution.
- Designed and pitched workflow concepts via Figma wireframes to client stakeholders; secured 100% approval across 10+ proposed use cases.
- Authored 22 SOPs defining product functionality, governance, and safety guardrails across UPI, RBI, and NPCI regulatory requirements, aligning legal, compliance, and engineering stakeholders.

MAHE Innovation Centre (Entrepreneurship Cells)

Aug 2025 - Present

President | Bengaluru, India

- Lead a portfolio of 8-9 early-stage startups and manage budget allocation of INR 1.5L; coach 12+ founders on product-market fit (PMF), user validation, and go-to-market (GTM) strategy - cross-functional guidance across product, design, and growth.
- Portfolio ventures raised INR 4L+ in seed capital, with 2 startups selected for an elite IIT Delhi accelerator cohort.
- Organized quarterly Demo Days attracting 15+ angel investors and venture capital firms, sharpening founders' pitch narratives and GTM positioning.

Bharat Heavy Electricals Limited (BHEL)

May 2025 - Jun 2025

IT Intern | Bhopal, India

- Delivered a dependency-modeling engine and API for cascade-failure simulation and criticality scoring, achieving 94% alignment with domain-expert judgment; secured IT leadership sign-off for rollout across 12+ enterprise projects.

Department of Telecommunications, Govt. of India

May 2024 - Jun 2024

Research Intern - Data & Policy Analysis | Bhopal, India

- Ran a data-driven gap analysis of national telecom rollout across underserved districts (SQL, Python, Tableau); briefed senior IAS officials and shaped national funding decisions, with findings featured in The Times of India.

PRODUCT PROJECTS

DigiNyaya - AI-Native Dispute Resolution Platform (Sarvam AI Startup Program, 2026)

diginyaya-frontend.onrender.com | github.com/shivaumsharma/DigiNyaya

- Identified an ambiguous, unaddressed gap in slow, costly legal dispute resolution and built an end-to-end product 0-to-1; launched to 100+ real disputes, resolving 78% without human escalation and cutting resolution time from 4 hours to 2.3 minutes.
- Designed a confidence-driven human-in-the-loop escalation model to balance automation speed with user trust; validated against an 18-case evaluation set (F1 0.87), cutting hallucination rate from 34% to 8%.
- Used root-cause analysis to find and fix a judge-evaluation bug penalizing the model's own required disclaimer language; redesigned scoring logic, lifting full-match accuracy from 38.5% to 50.8% and ruling-only accuracy from 69.8% to 79.6% against real court outcomes.

FinSight AI - Equity Research & Trading Platform

finsight-ai.streamlit.app | github.com/shivaumsharma/FinSight-AI

- Designed and shipped an AI-powered equity-research product end-to-end (UX/UI through deployment); cut report-generation time 4x (257s to 65s), directly reducing user time-to-insight.
- Synthesized live market feeds, SEC filings, and valuation models into a single personalized report experience tailored to each user's holdings.
- Built an evaluation framework scaled from 80 to ~1,000 tickers to stress-test model reliability and de-risk wider rollout.

SKILLS

Product & Strategy: Product Management, Product Discovery, Roadmapping, Competitive Benchmarking, Go-to-Market (GTM) Strategy, PMF Validation, Critical Thinking, Wireframing & UI/UX (Figma), Cross-functional Stakeholder Management, Regulatory & Governance Documentation (SOPs)

Data & Analytics: SQL, Python, A/B Testing & Evaluation Frameworks, Tableau, Product Metrics & KPIs

Technical Fluency: REST APIs, FastAPI, PostgreSQL, LLM/Agentic Systems, Cloud (AWS, Google Cloud Platform), Git/GitHub Actions
